## ***What does the future hold? Options for young adults after High School.***

What is waiting for our students after they leave school?

We've assembled a panel of experts to give you the information you need.

This is an essential program for parents and teachers of students of all ages. It is never too early or too late to help our young adults get ready for the "real world".

- What should we be doing RIGHT NOW to help these students become successful after they leave school?
- When should we start planning - at 18? at 14? sooner?
- Broadly, what are the options for our kids?
- Specifically, what will be right for your child?
- How can we take advantage of the unique strengths and abilities of each student?
- Who can help from the state and district, what can they do and how do you get them to help your child?
- Are there examples of people "thinking outside the box" to come up with unique solutions for unique students?
- Is college a possibility?
- Is there special help for the most cognitively challenged?

Unless you already have all the answers, you need to attend this meeting. Your child is counting on you.

**Panelists:** Mark Chamberlin, Department of Education  
Jan Abrams, High School/High Tech  
Lysbet Murray, University of Delaware  
Cory Nourie, Center for Disabilities Studies  
Joyce Kaufmann, Brandywine School District  
Gary Berg, Teacher, Hanby Middle School  
Lauren Padgett, [Lucusworks.org](http://Lucusworks.org)
